

# SATELLITE GROUP MEDIA KIT

October 2-3, 2019 – Houston, TX

- OilComm fosters a forward-thinking community to innovate the oil & gas industry.
- Attendees are 1000+ energy professionals who lead teams within digital technology departments and are responsible for communications, operations, optimization, automation, IT/OT, data, digitalization, edge-computing, cloud services, VR/AR, and machine-to-machine learning.
- 65+ exhibitors consist of companies that connect oil & gas industry with solutions that can help bring existing networks to a more efficient and effective state.
- The conference program is designed to marry the latest technologies in cybersecurity, automation, big data, digitalization, mobility to your business.

November 4-5, 2019 – Arlington, VA

- Explore the potential of the future 5G-connected ecosystem.
- Attracts telcos, enterprises, policy/regulatory officials, city/state/federal government, satellite service providers, device manufacturers, advocacy/industry groups/associations.
- The conference program covers how 5G eliminates restrictions for customers, evolves concepts of seamlessness & mobility, changes the automobile industry, enables smart city technology, provides the telecom industry with the opportunity to maximize profits by working together, and more.
- The only event attracting high-level stake-holders from government and industry, as well as all technologies comprising future 5G networks and services.

NOVEMBER 7-8, 2019 - RESTON, VA

- A unique and powerful opportunity to understand the most pressing cybersecurity threats to satellites and the potential impact these threats have on your company's interests, your readiness to adapt to these threats, and how to best prevent attacks.
- Space, satellite service providers, C-Suite Executives, engineers, cybersecurity experts, Intelligence agencies and the DoD gather for strategic insights and networking discussions on best practices for achieving end-to-end protection within the entire satellite ecosystem.
- Offering Classified Day, a full day of classified sessions held at the TOP SECRET//SI//TK//NOFORN and SECRET//NOFORN levels.
- Professional workshops led by leading experts in the business geared at real world scenarios, prevention, and solutions.

March 9-12, 2020 - Washington D.C.

- The largest global satellite and space technology event with 16,000+ attendees from aerospace, enterprise & consumer industries, finance, broadcast & content providers, military & government, satellite, transportation, telecommunications.
- 350+ exhibitors from companies that supply solutions for connectivity, access to space, hardware, imagery/sensing, software and more.
- The conference program consists of 65+ sessions and covers 5G, government & military, cyber-security and interference, ground segment, engineering, innovation, mobility, finance, and more.
- 100+ members of the press attend, including Wall Street Journal, CNBC, Bloomberg TV, Reuters, Washington Post, Via Satellite and more.
